

# The 8<sup>th</sup> Leuven Course on Ear Imaging

**May 30 – June 1, 2024**

## Organisation

Prof. Dr. Robert Hermans, Department of Radiology, University Hospitals Leuven, Belgium

## Course objectives

- review state-of-the-art imaging methods of the temporal bone and related structures
- review normal radiological anatomy of the temporal bone and related structures
- review the imaging findings in common and uncommon diseases of the temporal bone and related structures
- provide the participants with the opportunity to learn and test their knowledge actively, in an interactive set-up with the teachers

## Participants

To ensure interactivity with the teachers during the course, the number of participants is limited.

## Course language

English
